EXPERIENCE

REZO-VR

- Worked as a VR Developer Intern on the project Bow-Warrior.
- Collaborated with the design team to understand and implement project concepts and designs using Unity.
- Took responsibility for optimization, developing Enemy AI logic, and ensuring a seamless game flow.
- Contributed valuable design ideas to enhance the overall quality and user experience of the project.

10 Jan 2023 - 10 July 2023

GAME FEEDBACK SYSTEM

- Collaborated with a team to develop a Firebase-based game review system used during a Game Expo at the college.
- Integrated the system with a real-time leaderboard to display the rankings of the best-performing projects based on Art, Mechanics, and User Experience.
- Enhanced the system for deployment at the IGDC Expo booth, representing the college's projects and enabling efficient feedback collection.

BEAN 'EM ALL

- Worked on one of the most enjoyable and insightful projects, gaining valuable knowledge about game feel and design principles.
- Played a key role in enhancing gameplay engagement to improve player experience.
- Focused on creating immersive and interactive gameplay elements to elevate the overall quality of the project.
